MORE FROM WOOD.

EGGER | EUROFORM® Postforming

A powerful combination: EGGER EUROFORM® Postforming

The substrate for EGGER EUROFORM® Postforming products – EGGER EUROSPAN® – is manufactured from carefully selected wood from forest thinning as well as selected wood residues. The technical performance of these boards meets, and often exceeds, the standard requirements, whilst the light coloured timber used provides the typical fine surface that is optimum for applying decorative finishes. Tarmac storage areas ensure that the raw material is kept clean, which is a major advantage in the processing chain and considerably increases tool life.

However, it is not until EUROFORM® Laminate is applied that EUROFORM® Postforming products obtain their unmistakable character. EUROFORM® Laminates guarantee attractive, realistic reproductions with economical processing advantages and high wear resistance.

Modern printing techniques allowing the most natural decor reproductions, in addition to the high quality materials used and the high precision technologies applied, represent sound reasons for their application. In combination with perfect surface texture developments, the look and feel of the decors make them an ideal reproduction of the original materials.

EGGER | EUROFORM® Postforming

The ideal solution for your living, relaxation and working environments

A total solution from one supplier – the combination of EUROSPAN® Rawboard and EUROFORM® Laminates – equals quality and diversity.

The standard of the decors is not the only reason why EUROFORM® Laminates are a popular choice. Their quality characteristics such as high abrasion, impact and scratch resistance provide an ideal processing material, offering assurance and creative freedom.

EGGER's spectrum of profile models and decor collections offers you appropriate and modern solutions for all living, relaxation and working environments.

The economic aspect of EUROFORM® Postforming products and the development of up-to-date decors and surfaces are further advantages provided by EGGER.

The decisive factor is that your individual requirements are met. The variety of EGGER substrates available, as well as the facility to offer tailor-made solutions, allow us to realise almost any EUROFORM® Postforming product requirement.

EGGER | EUROFORM® Worktops

EGGER | EUROFORM® Worktops

EUROFORM® Worktops

EUROFORM® Worktops are used wherever there is a requirement for an attractive finish that can withstand heavy use. In such environments, the appeal of shape, colour and texture are just as important as functionality. By combining EUROFORM® Laminates with EUROSPAN® E1 Rawboard, we are able to meet all decorative and quality requirements.

Our EUROFORM® Worktops are supplied with a polyurethane hot melt adhesive coating on the back edge and a UV lacquer sealing strip along the front edge (on the underside), providing added safety and moisture protection.

All EUROFORM® Worktops feature a special overlay and are designed to provide a high level of abrasion resistance. Choose from 14 different profile models and the decors of the Global Collection and give your creativity a free rein. For this reason, EUROFORM® Worktops are not only installed in kitchens, they are also readily accepted in bathroom, office and living room furniture.

EGGER | EUROFORM® Front Elements

EGGER | EUROFORM® Front Elements

EUROFORM® Front Elements

EUROFORM® Front Elements open up a world of creative possibilities.

The choice of EUROSPAN® Rawboard or FORMline® MDF offers the flexibility of a large variety of profiles whilst the decors from the Global Collection are available to support your creative designs.

The result: high quality front elements, with high functionality and creative design for furniture and interior design solutions alike.

High quality and contemporary in design, EUROFORM® Front Elements are durable even under the toughest conditions and appeal in both form and function with seamless surface-to-edge contours.

EGGER | EUROFORM® Window Sills

EGGER | EUROFORM® Laminated Composite Boards

EGGER | EUROFORM® Window Sills

EUROFORM® Window Sills

The ideal solution for new buildings, redevelopments and renovation: practical, robust and in an attractive choice of decors.

EGGER EUROFORM® Window Sills fit all windows.

Available in 4,100 mm and 5,200 mm blanks to reduce waste during fitting and to eliminate the need for joints even for wide window openings.

EGGER | EUROFORM® Laminated Composite Boards

EUROFORM® Laminated Composite Boards

EGGER EUROFORM® Laminated Composite Boards add the finishing touches to applications where further matching surface solutions are required.

Laminated composite boards have many varied applications and are often used as an alternative to tiles in the form of splash back recess panels. The harmonious look of matching worktops and splash back panels is a popular choice. However, where colour contrasts and accents are desired, genuine aluminium laminates for example, lend themselves perfectly to this application.

The combination of laminated composite boards and PVC edging allows individual styling for a vast range of applications such as fronts, end panels, slotted shelving systems etc.

EGGER EUROFORM® Postformed Elements

The ideal solution for office and shop fitting applications

Modern solutions need to appeal visually as well as being fit for purpose. Desk tops and work surfaces, frames as well as wall & shelving systems, should not only be easy to clean and hard-wearing, but also act as visual features within the overall design concept.

In shop fitting and office situations alike, worktops are considered to be among the most important elements that will determine the functional success of an installation. Furthermore, the importance of working in a pleasant environment is now widely accepted. The profile model options available in the EUROFORM® Postformed Elements range offer solutions for a wide range of different applications.

EGGER EUROFORM® Postforming Models

Model series	Profile	Mod. No.	Thickness of Substrate (mm)					Application Areas
			Worktops	Front Elements	Postformed Elements	Laminate Composite Boards	Window Sills

Mod 801		801/6	–	–	–	–	19 (38)	Window sills

EGGER EUROFORM® Postformed products are available as blanks in standard lengths and widths or supplied as finished furniture components. Individual dimensions available on request. Profiles can be offered on one or two sides with the exception of Mod 304/8.

More detailed information can be requested from www.egger.com.

EGGER | EUROFORM® Postforming Tailor-made Solutions

The processing requirements are as varied as the production possibilities.

The decisive factor is our ability to respond and co-ordinate your individual requirements. By applying processes such as milling, grooving, rebating, edging and drilling, high quality EGGER EUROFORM® Postforming products are value engineered on state-of-the art production lines and processing centres and converted into high quality prefabricated furniture components.

For detailed information on tailor-made EUROFORM® Postformed Elements please refer to the 'EGGER Prefabricated Furniture Components' brochure or go to www.egger.com.

EGGER | EUROFORM® Melamine Edge Banding and Accessories

EUROFORM® Melamine Edge Banding

EGGER EUROFORM® Melamine Edging material is suitable to finish many types of decorative surface. Available pre-glued with hot melt adhesive or unglued. They can be supplied in all decors and structures as shown in the GLOBAL COLLECTION.

Splash back/recess panels

Wall seal system with internal and external corners

Safety edging
